

Final Steps for Lake Lanier Lottery Process

1. Preliminary results of the lottery drawing will be posted on the contractor-maintained website in near real time subject to the ability of the contractor to enter the information into the database.

The Official Certified Lottery results will be posted on line on 2 Nov 2009 for a period of 30 days.

A copy of the Official Certified Lottery results will be added to the Lake Lanier Project website and used to track the ranked properties, the result of their administrative review under the Shoreline Management Plan (2004 SMP), and the available number of dock permits.

2. Once this list is received by the Shoreline Management staff they will begin contacting the individuals on the request letters, by phone, in sequential order determined by the lottery.

3. When contacted by one of the Shoreline Management staff, an appointment will be made to meet with the requesting individual at the property to evaluate the site for eligibility. If there is a reason why the property does not qualify for permit and this can be determined by the Shoreline Management staff prior to a site visit at the property, no appointment will be made and an explanation will be provided, in writing, why they were denied. Appointments will be booked at a rate at which staff feels is appropriate to allow for proper evaluation.

4. Appointment procedures will follow historical procedures with the park ranger either recommending a permit, allowing the adjacent landowner to apply for the permit, or denying the adjacent landowner for not meeting the criteria to be eligible for a dock permit.

5. The lottery list will be updated frequently on the Lake Lanier Project website to reflect permits issued and number of permits remaining.

6. Be sure to check websites and follow press releases for progress on permits.
