

# County Administrator Goals

## for Hall County Government

Randy Knighton

County Administrator

*I have the tremendous honor of now serving as County Administrator. Serving in local government is an honorable and noble profession. I approach this new position with a great deal of humility and purpose.*

*I am acutely aware of the many challenges we currently face. With that in mind, I have set certain goals to be accomplished in the next 30-day period. These goals are intended to focus our efforts on providing additional efficiency and service to Hall County citizens.*

*Our mission as a county government is to provide a high level of service to the residents of this great community. I look forward to working with the Commissioners, staff and citizens to support the vision of our Commission in realizing Hall County's fullest potential.*

The County Administrator has established goals that he plans to accomplish during the month of August. His overall mission is to strengthen communications and foster strong working relationships throughout the county. These goals will serve to focus the efforts of the staff while updating residents on the steps their county government is taking to move in a positive direction.

## 30-day goals

**Develop a formal mechanism to solicit citizen input** on a variety of matters. We want to know how our county government can serve our citizens at a higher level.

**Collaborate with staff to evaluate the entire organizational structure** to determine if and where there can be streamlined operations, greater integration across departmental functions, and cross-training of employees.

**Challenge all county departments to assess how their operations follow the county's mission** to "promote, encourage and develop a strong, viable community and ensure that all citizens share in prosperity by providing efficient, accessible and responsible public service."

**Develop a clear method of communicating revenue and budget updates** to the citizens and Board of Commissioners on a regular basis.

**Meet with the constitutional and other elected officers** to better understand the needs and demands of their respective offices. This will result in a better flow of communication between county departments and more efficient use of county resources.

**Meet with the Hall County Board of Education** administration to further explore partnership opportunities and ways the county can support the efforts of the school system to advance education for all students in Hall County.

**Meet with the Chamber of Commerce** to enhance ways of providing support for economic development opportunities throughout the county.

**Meet with all city governments** in Hall County to establish better communication and potential collaboration between the county and cities.
